§2–1306.

- (a) The University of Maryland Center for Environmental Science shall establish science—based sea level rise projections for Maryland's coastal areas and update them at least every 5 years.
- (b) The science—based sea level rise projections shall include maps that indicate the areas of the State that may be most affected by storm surges, flooding, and extreme weather events.
- (c) The science—based sea level rise projections required under this section shall be made publicly available on the Internet.
